

CLEARSWIFT SECURE Email Gateway

CLEARSWIFT SECURE EMAIL GATEWAY IS AN SMTP GATEWAY DESIGNED TO PROVIDE SECURE EMAIL MESSAGING FROM 50 USERS TO 50,000 USERS.

SC MAGAZINE RATING	
Features	★★★★★
Performance	★★★★★
Ease of use	★★★★☆
Documentation	★★★★☆
Support	★★★★★
Value for money	★★★★☆
OVERALL RATING	★★★★★
For Peer grouping provides centralised management, excellent anti-spam and web filtering performance, good value for money	
Against Filtering policies initially look complex, HTTPS scanning costs extra	
Verdict A classy web content and email security solution, well suited to SMBs	

Clearswift's multi-function Email Gateways offer all the messaging communication controls to provide a highly effective, productive and resilient email security solution.

Your network is kept free of Spam and Viruses, you control the email flow through your business. You can create policies for email collaboration without impacting productivity. Sample policies can be tailored to build bespoke policies that will help you mitigate data loss, regulatory, legal and reputational breaches. Policy can also be used to control whether messages and their attachments are encrypted using industry standard protocols.

The simple and powerful User Interface means that administration tasks are simplified reducing operational cost. Larger environments running multiple servers gain benefits through built in multiple server management, policy definition and reporting.

KEY BENEFITS

- Built in Encryption (S/MIME, PGP, TLS and password)
- Zero - Day Anti-Malware
- Built in Anti-Virus
- Fully featured Anti-Spam
- Reporting as standard
- Central Management
- Granular Policy
- VMware ready
- Easy to use

Platform choice allows you to define how you want to buy and operate your Clearswift Gateway. Either delivered as a pre-packaged Dell server based system or as software download to let you deploy on your own hardware or onto a Virtual platform such as VMware or Hyper-V.

Customers can mix and match their platforms to suit their deployment whether it's a physical appliance for the primary datacenter and a virtual appliance for the disaster recovery center, both machines can be connected together for seamless management.

“The appliance has been an excellent upgrade from the SMTP version, performance and reliability has been outstanding”

Steve Morris - Network and Security Manager (Express Newspaper)

Clearswift SECURE Email Gateway

FEATURES	BENEFIT
POLICY	
Flexible policies	Define advanced policies to control how email is shared, stored and distributed.
Centralised Control	Auto-updating of policies to multiple Clearswift Gateways for consistency and time saving
Active directory (AD) and LDAP integration	Define policy by user, user groups, domain or any directory combination.
HYGIENE	
Bi-directional malware scanning	Stops known and unknown malware infection with built in Kaspersky Anti Virus.
TRUSTmanager™	IP adress sender reputation and connectivity filter rejects up to 80% of spam
SpamLogic™	Multi-engine anti-spam to provide at least 99.5% spam detection.
Built-in Encryption	S/MIME, PGP, TLS and password encryption for server to server message security
CONTENT INSPECTION	
“True type” binary file-type controls	Accurate identification of attachments to detect file types.
Content-aware content inspection	Deep content inspection identifies data accurately and allows complex policies to be constructed and deployed
Lexical and Regular expressions	Keyword search capability in messages and attachments using words, phrases and regular expressions. Ability to detect common business and personal details such as Credit card details and Identity information
Supplied Dictionaries	Mutli-language profanity and editable compliance dictionaries including GLBA, HIPAA, SEC, SOX, PCI and PII
MANAGEMENT AND REPORTING	
Intuitive Web based interface	No requirement to learn Linux
Pre-defined reports	Easy to modify, run and share reports with interactive drilldowns.
Customizable scheduled reporting	Allows you to create once, run and distribute via email
Multi-appliance reporting	Consolidated view of user activity for easier analysis and sharing of security and management data.
Multi-appliance message tracking	Run message tracking queries from any node in your configuration
Multi-appliance quarantine	Consolidated management of quarantine areas across a distributed deployment
Granular access to quarantine areas	Controls which administrators have access to what quarantine areas and messages
Back-up and restore	Scheduled and immediate back-ups of policy, data and logs for auditing purposes
End user spam release mechanism	Delegation of spam to users reducing administration. Includes per-user Whitelists
DEPLOYMENT	
Dell Appliance	Pre-installed on Dell hardware. Backed by worldwide field service agents to repair at your site, in the unlikely event of hardware faults
“Soft” Appliance	Allows you to choose the platform you want to run it on. Wide range of support devices from Dell, IBM or HP
Virtual Appliance	Enables security and server consolidation in a choice of virtualization environments; ideal for both production and disaster recovery deployments

Clearswift Global Support

Clearswift Global Support provides access to technical support that covers all the components within our solutions.

Clearswift Global Support is available as ‘Standard Support’ on a 24x7 basis with additional ‘Advanced’ and Premium options available.
